HUiTM Highlights

By Professor Dr. Sazzli Shahlan Kasim

Picture 1: The ladder of success

Assalamualaikum wbt. and I am wishing that everybody remains well and safe during these challenging times. As we negotiate the next few weeks entering into the last quarter of the year, in parallel with the conditional movement-controlled order (MCO), I would like to take the opportunity to highlight some silver linings in what has been otherwise grey and cloudy weather for the majority of us. COVID-19 has not only impacted the public, our patients, our students but more importantly ourselves. We may not realize the mental anguish, distress, family hardships as well as sympathy and empathy for those who are suffering worse off than us.

Picture 2: IINDEX2020 Competition

With that in mind, I would like to congratulate to all our IINDEX2020 winners, who have done remarkably well in securing and embarking on the face transformation for Hospital UiTM being an innovative and premier hospital. We hope that we can produce more innovation that will secure our beds in the future to be the premier hospital in the country. It is very important for us to remember our objectives and to remain steadfast in achieving our goals.

We must not work alone, we must collaborate across boundaries, across specialities, across disciplines to reach greater heights. This is easier said than done. As you all know, there are barriers and walls erected by many to protect themselves and to protect their interests. We must respect these barriers and find common ground to work around so that we can use these walls to escalate even greater walls and greater heights and achieve greater rewards in the future.

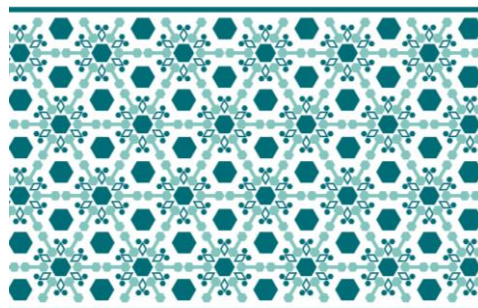

Picture 3: Man jumping over cliff

With that in mind, I would like to announce the first-ever Centre of Excellence (CoE) under the auspices of the hospital and the medical faculty and this shall be called Cardiac Vascular Lung Research Institute (CALVARI). This shall see the fate and directions of PPUiTM Sungai Buloh which has been the questions for many. Without clear directions and strategies, we are endangered of being extinct species in this challenging environment, hence, it is important to remain relevant and focus on our niches so that we would be able to contribute to areas of gaps in delivering healthcare. CALVARI will be the start of precedence by many other centres of excellence I am sure, I hope to see work to be done for the other niche areas so that all of you would be able to look back in the next 20 years and know that you are part of this magnificent journey in transforming UiTM to be the global player.

Updates from Department of Corporate Communications

Picture 4: HUiTM Pattern and graphics

We would like to introduce our hospital's pattern which was recently approved by *Jawatankuasa Imej dan Identiti Korporat* with UiTM logo remains as the official logo for HUiTM. The pattern is the official face of HUiTM, a point of identification; they're the symbol that clients and patients use to recognize our hospital. The visual trademark, inspired by the Zam Zam water molecules, can be found everywhere at Hospital UiTM Puncak Alam. The Zam Zam molecules curing properties and its ample amount represents how the hospital is providing ample care and capabilities in curing disease. The pattern also incorporates Islamic design elements such as hexagonal geometric motifs and interlacing patterns.

Updates from Department of Quality Improvement and Patient Safety (QIPS) by Dr. Julina Md Noor

As the HUiTM Puncak Alam is nearing its completion, Department of QIPS is working hard to prepare all the documents that are necessary for the running of the hospital. QIPS are happy to report that the final draft for General Hospital Operational Policy (GHOP) and Medical Bylaws are now ready and currently being reviewed by HUiTM Law Office. These two hospital documents were the results of a combined effort of top managements, various head of departments along with many others. The workshop took place at Awana Hotel, Genting Highlands on 17-19th Aug 2020, attended by Dean of relevant faculties, including Faculty of Medicine UiTM to ensure both GHOP and Medical Bylaws are accurate and applicable.

Following these, Department of QIPS continued working on Clinical Department policies. The objective was to ensure that all clinical departments will be ready to start their services with clear policies in place when HUiTM Puncak Alam starts its operation. All clinical heads and team were involved and dedicated to present their documents at the Dorsett Hotel, Putrajaya on 28-30th Sept 2020.

QIPS's next tasks will be on Clinical Support Department policies which will take place early next year. At the same time, Department of QIPS is also in the process of making sure all the forms are streamlined, compiled and recorded and ready by March 2021.

Picture 5: Participants of GHOP and Medical Bylaws Workshop

Picture 6: Participants of Clinical Department Policies Workshop

The Department of QIPS would like to take this opportunity to thank all members of HUiTM for diligently and tirelessly working on all these assignments. None of this would've been a success without each person's contribution, and for that, we are grateful. We hope this spirit will continue and strengthen HUiTM journey in becoming a premier hospital.
